

Jerold Durairaj

Infrastructure & Cloud Architect

📍 Chennai, | ✉ jerold.d.raj@gmail.com | ☎ +91 93846 91518 | 🔗 LinkedIn: [linkedin.com/in/jerold-durairaj](https://www.linkedin.com/in/jerold-durairaj)

Professional Summary

IT Infrastructure & Cloud Architect with 20+ years of experience designing, migrating, and modernizing enterprise environments across Azure, AWS, VMware, Kubernetes, and Windows Server. Proven expertise in cloud adoption frameworks, hybrid cloud integration, virtualized datacenter operations, AD modernization, DR/BCP strategy, and security hardening. Strong automation skills using Terraform and Python, delivering significant reduction in manual operations and improving platform reliability. Trusted L3 escalation specialist with a strong record of stabilizing large-scale platforms, optimizing performance, and leading cross-functional engineering teams.

Technical Skills

☞ Cloud Platforms

- Azure: IaaS, VNet, NSG, VPN Gateway, Azure Migration and CAF.
- AWS: EC2, VPC, IAM, S3, Migration workflows
- PAM: Teleport

☞ Operating Systems & Directory Services

- Windows Server 2012–2022 / Ubuntu OS and Active Directory.

☞ Virtualization & HCI

- VMware ESXi, vCenter, HCI / vSAN and vLCM
- NSX-T (Segments, Overlay, TEPs, TZone and EDGE)
- Cluster design, HA/DRS, vMotion, Storage vMotion

☞ Containers & Orchestration

- Docker, Kubernetes (multi-cluster), Scaling, CNI Calico Plugin and Monitoring

☞ Infrastructure Automation

- PowerShell, Terraform, Python, Azure CLI, AWS CLI

☞ Backup & Disaster Recovery

- Veeam Backup & Replication, Azure Backup, ASR, DR Drill.

☞ Networking & Security

- Firewalls (Cisco ASA, Fortinet), Load Balancers, VPN Gateway, NSG/ASG

☞ Monitoring & Observability

- ELK Stack, Azure Monitor, Log Analytics and Event Viewer

☞ Automation Tools

- Make.com, n8n, BotBee, Custom GPT Automation
-

Professional Experience

☞ Architect – Hexaware Technologies

Aug 2021 – Feb 2025 | Chennai, India

- Administered and optimized a multi-region AD and virtualization environment with 5,000+ users and 3,000+ VMs across global datacenters.
- Led enterprise-wide Azure hybrid cloud migration initiatives, enabling seamless workload mobility with zero unplanned downtime.

- Designed and delivered scalable Azure + VMware infrastructure architectures improving uptime and operational reliability.
- Implemented AD backup & recovery PoC, reducing potential downtime and improving recovery validation.
- Achieved 98% SLA compliance, reducing MTTR by 40% using automated monitoring and remediation scripts.
- Performed complex L3 escalations, stabilizing mission-critical applications and infrastructure services.

☞ **Senior Systems & Network Administrator | K C Dat (S) Pte Ltd - Feb 2018 – Dec 2020 | SG**

- Managed 24x7 private cloud environment (VMware, AD, Exchange, firewalls) supporting logistics operations.
- Upgraded VMware ESXi from 6.x to 8.x with zero downtime using rolling upgrade strategy.
- Performed OS & AD migrations from Windows Server 2012 → 2019 across multiple sites.
- Administered Veeam Backup & Replication and coordinated DR drills every 6 months.
- Migrated security stack from Cisco ASA to Fortinet, improving perimeter protection.
- Delivered consistent L2/L3 support for complex systems, networks, and security incidents.

☞ **Senior Systems & Network Engineer | Sierra Solutions Pte Ltd - Feb 2014 – Dec 2017 | SG**

- Supported SAP development environments, ensuring optimized compute & storage performance.
- Managed server upgrades, network infrastructure, and security improvements across multiple sites.
- Migrated 150+ mailboxes from Zimbra to Microsoft 365, improving performance and collaboration by 40%.
- Performed user provisioning, license assignment, mailbox management, and distribution group administration across multi-region environments.
- Administered NAS storage, DR backups, and secure file access for distributed teams.
- Managed switches, routers, firewalls, and end-to-end connectivity across business units.

Key Projects & Achievements

☞ **Azure File Sync Hybrid File System Deployment**

- Migrated on-perm file servers to Azure File Sync and enforced strict network hardening by configuring IP-based restrictions to allow access only from authorized client networks, resulting in improved resiliency and faster restore operations

☞ **VMware vCenter to Azure Migration**

- Supported Azure Migrate–based VMware to Azure migration activities, including assessment dependency analysis, configuring replication setup, test failover execution, health validation, and lossless production cutover.

☞ **SAP Server Migration to AWS**

- Migrated SAP workloads using OVA conversion, S3 import, and AWS CLI, improving scalability and reducing operational cost.

Education

- Bachelor of Business Administration (1997–2000) Ponnaiyah Ramajayam College, Thanjavur

Certifications & Training

- Microsoft Azure Architect – Udemy
- AWS IAM & Cloud Security – Udemy
